Please Note:

Litter registration is required if ANY kitten is to be individually registered, either now or in the future. This rule applies even if there is only one living kitten. Register your litter as close to the time the litter is born as possible, even if no kitten/s are being individually registered at that time. Individual kitten registrations can be processed more quickly if a litter has been previously registered.

Cats or kittens registered with another Cat Registry may be registered individually by completing the appropriate sections of this form and by providing a copy of the Certificate of Registration from that body which shows the owners name and address. Certified Pedigrees will need to be submitted for all imported cats.
